Description

The Makulan business center is conveniently located near the three metro stations Leo Tolstoy Square, the Sports Palace and the Theater. The business center consists of 7 buildings, each of which has a front entrance and an entrance from the courtyard. Today, the reconstruction of the entrance group is being carried out, which will transform into bright presentable windows. The interior of the business center is discreet and neat. The premises were renovated in the same style. Own parking in the courtyard makes it easy to park the car in the city center. The Makulan business center is perfect for companies that need a profitable location.
